EXPERIENCE

December 2022 - Present
Junior Consultant/Engineer, Capgemini Engineering, Eindhoven
Working as a young professional in Technical Application Engineering unit.

April 2022 - October 2022
Graduation project, Philips, Best

Research question
The research question can be formulated as: Given an event log from a human-computer interaction system, how can the efficiency of the traditional user behavior study be improved by an integrated representation of information in temporal and spatial dimensions

A graduation project that applies data science approach, especially the process mining knowledge to clinical system log from Philips iXR system.

September 2021 - Feburary 2022
Data analyst Intern, Unilever Food Innovation Center, Wageningen

A 6-month internship in department of Food Package&Processing at Unilever. The internship project is to analyze the possible reason(key ingredient groups) for powder food caking. During the internship, classification of the ingredients based on different standards are the top difficulties. Statistical tests are combined to validate the essential ingredient features. Linear regression is applied to make a prediction of caking risk. The script is written in Python.

EDUCATION

September 2020 – October 2022
Master of Data Science in Engineering

Eindhoven University of Technology, Eindhoven, The Netherlands

Master Project: Data-driven Approach for Reproducing Use Scenario Using Machine Logs(Python) Result : 7/10

September 2017 – July 2020
Bachelor of Computer Science

Vrije Universiteit Amsterdam, Amsterdam, The Netherlands

Bachelor Project: A Comparison of Path-tracing Based Sampling Strategies for Global Illumination Methods(C++) Result : 8.5/10

September 2016 – July 2017
Bachelor of Computer Science and Technology

Nanjing University of Chinese Medicine, Nanjing , China

SKILLS

Language
Chinese(Native), English(Professional working level), Python

VOLUNTEER WORK

September 2019 - November 2019
Student assistant, Vrije Universiteit Amsterdam, Amsterdam

Student assistant for the course Advance Programming for Computer Science (2nd year course in Scala). Assisting the professor with the practical session, question answering and assignment grading.

September 2018 - July 2020 ## International Student Ambassador

International student ambassador in Vrije Universiteit Amsterdam. Helping with the international admission of students outside the Netherlands. Helping with the events to the potential students and study groups from other countries.
